

Dear Client

Advanced Corporate Solutions (ACS) would like to take this opportunity to wish you and your enterprise a prosperous 2016. Your continuous support is highly appreciated and we look forward to enhancing our business relationship and providing services to you and other potential clients, this year.

The advancement in the field of technology and digital development necessitates ongoing research and development. ACS was fortunate enough to receive an invitation to attend the World Expo of Surveillance and Technical Equipment, held at Millipol, Paris, France, during November 2015. ACS technical staff attended this Expo.

This exhibition takes place every four years and new technology, trends and active solutions were on display. Access to Millipol expo is restricted and all representatives are pre-screened and exclusively admitted. ACS is proud to inform our clients that we are currently on par with our international counterparts in respect of expertise in the field of "debugging", methodology, equipment and related trends, as a result of this

visit.

Dynamdre

ACS is in association with Dynamdre, a leading company in digital forensics. Dynamdre complements our “Debugging” investigations with digital and mobile technology, which include vulnerability and analysis solutions.

Principally, mobile forensics is becoming a cardinal element in eavesdropping and investigations, demanding expert skills and technical expertise. Dynamdre initiated the development of techniques and proprietary software which allow their forensic investigators to probe and recover relevant information previously deemed unrecoverable.

At the beginning of this New Year, with its many prospects and challenges, ACS would like to encourage all our clients to prioritize the protection of trade secrets and intellectual property (IP), by regular and intensive surveillance counter measure investigations.

ACS has successfully conducted surveillance counter measure investigations for the past 21 years, both locally and abroad. We would appreciate the opportunity to offer you a professional service, based on a comprehensive inspection of your premises, followed by an analysis and detailed report in respect of findings and recommendations.

ACS would like to provide you with outstanding services to ensure safe retention of your company's Trade Secrets and Intellectual Property (IP) which will leave your business with complete peace of mind in 2016.
