ACS – MILIPOL PARIS, NOVEMBER 2023

TECHNICAL SURVEILLANCE COUNTERMEASURES (TSCM) "DEBUGGING"

With our recent visit to the Milipol Paris Exhibition, the growing threat of Global Corporate Espionage was once again highlighted by TSCM and Security professionals from around the globe. A regular TSCM "debugging" program remains a necessity to ensure the protection of Company Intellectual Property (IP) and Communication Security.

Advanced Corporate Solutions (ACS) visited the Milipol Paris 2023 Exhibition (www.milipol.com) hosted in Paris, France from 14 to 17 November 2023.

The aim of our visit was for ongoing Research & Development on the latest advancements in Technical Surveillance Countermeasures (TSCM) "Debugging" services, TSCM equipment and eavesdropping devices available in the current global market. We were fortunate to meet with many international role-players in the Industry, of which Research Electronics International (REI) (www.reiusa.net) was one and we would like to thank REI and all other Exhibitors for their valuable input and hospitality. Our sincere appreciation also to Milipol Paris and the organisers of the Exhibition for yet another exceptional and very professional global event.

During our interaction with Global Security Professionals, the growing need for international collaboration in TSCM efforts was highlighted due to the global nature of espionage and electronic surveillance threats. We would like to share the following key points from discussions with Exhibitors:

- As technology continues to advance, so does the sophistication of surveillance and eavesdropping devices.
- Corporations are increasingly recognising the importance of TSCM in safeguarding their proprietary information, trade secrets, and Intellectual Property.
- The global TSCM market has been expanding as more organisations seek TSCM services and equipment.
- The threat landscape for electronic surveillance and eavesdropping is continually evolving and Corporate Espionage remains a significant threat, therefore, TSCM efforts must adapt to address these changing risks.

Advanced Corporate Solutions

TSCM | "Debugging" Specialists | Service Excellence since 1995

Advanced Corporate Solutions (ACS) provides all-encompassing, comprehensive TSCM "Debugging" Investigations using the most modern and technologically advanced equipment available in South Africa.
