ADVANCED CORPORATE SOLUTIONS

30 YEARS OF SECURITY EXCELLENCE

At Advanced Corporate Solutions (ACS), our Technical Surveillance Counter Measure (TSCM) represents a benchmark in security excellence, thus providing a comprehensive suite of services tailored to meet the intricate challenges of broad-based corporate clients globally. By leveraging cutting-edge technology, innovative methodologies, and highly skilled personnel, our team ensures that our clients' Intellectual Property (IP), Confidential Projects, and Information Assets are safeguarded against sophisticated eavesdropping threats.

We pride ourselves in **being at the forefront of Research and Development**, and our facilities hosts an online platform dedicated to storing research documents, training manuals and case-studies, all accumulated over a span of 30 years.

The TSCM team's operational approach is characterized by rigorous **ongoing training, collaboration, and adaptability**. Each member undergoes continuous professional development, including simulations of real-world scenarios, enabling them to respond swiftly and efficiently to dynamic security challenges. Our internal culture fosters collaboration, allowing team members to share knowledge and innovate collectively. This synergy is particularly evident in the team's ability to identify vulnerabilities proactively and implement bespoke solutions to mitigate risks.

We maintain a global network of TSCM and intelligence relationships with leading TSCM companies, organizations, and suppliers. This network enables us to consistently provide our clients and prospective clients with accurate and timely advice regarding our ongoing services.

At the heart of our success is the **use of advanced TSCM equipment, complemented by thorough physical searches of the areas involved**. Our team utilizes state-of-the-art technology designed to perform specific tasks during assessments. Their technical expertise ensures that these tools are not only used effectively but are also customized to meet the unique requirements of various operational environments. To obtain detailed insight into the TSCM equipment, please visit our website: www.acsolutions.co.za

One of our most significant achievements is the **development of a proactive threat identification framework**. By analysing emerging security trends and incorporating client feedback, we have created a system that not only addresses existing vulnerabilities but also anticipates potential threats. This forward-thinking approach has been instrumental in preserving client trust and ensuring operational continuity.

Advanced Corporate Solutions (ACS) is seen as the most prominent role player in the TSCM "Debugging/Sweeping" field in South Africa.

We provide all-encompassing, comprehensive TSCM "Debugging" Investigations using the most modern and technologically advanced equipment available in South Africa.

- Home Environments
- Residential Estates

Ongoing, effective communication with our corporate clients is another key pillar of our team's success. Through the delivery of detailed reports, actionable insights, and transparent updates, we ensure that our clients are consistently informed and equipped to make strategic decisions. Additionally, our ability to cultivate and sustain strong relationships with clients, technology partners, and industry regulators significantly enhances the overall effectiveness of our operations.

Furthermore, we advise our clients to **implement an Intelligence Care Management system**. The Intelligence Care Manager should be accountable for overseeing the entire security process within the company, ensuring that all integrated security systems function effectively. This role involves maintaining continuous communication and monitoring, 24/7, as the entire security infrastructure requires constant oversight to ensure seamless and uninterrupted operation.

In summary, the ACS security team has achieved exceptional performance by integrating innovative tools, an industry leading strategic framework, and outstanding teamwork. This holistic approach has established our team as a leader in the TSCM field, empowering our clients to operate with confidence and resilience.
